

*The Covid pandemic continues to cause havoc and uncertainty to businesses; business owners are having to juggle finances to stave off the impact of the Lockdown. It is now, more than ever, important that businesses review their energy contracts to ensure that the most appropriate and cost-effective contracts are in place. It is easy for businesses to forget to negotiate a contract renewal resulting in a business being automatically placed onto a Deemed (out of contract) rate which will be significantly higher than a contracted rate.*

*UB Services UK will ensure that you never miss a contract renewal date; we have a dedicated team who will review your contract and ensure that you do not roll over onto a Deemed contract. Not only will this save you money, but it also takes the headache of securing appropriate energy contracts away from you.*

*The Lockdown and the associated business closures have seen a reduction in the demand for gas; as a result, prices have reduced and are currently at a level not seen for 15 years. UB Services UK's bespoke pricing package can secure you today's low price to start anytime up to 2025, regardless of when your existing contract(s) end.*

---

*With over 25 years in the energy business with a portfolio of clients who have retained our services year on year, we at UB Services UK are well placed to ensure that you get the right energy contracts for your business.*

*A quick call to our office on 0161 998 7138 for a free consultation will enable you to see what potential savings you can make on your energy costs.*
